## PACKAGE B → CAVE JOMBLANG EXPLORING + PINDUL CAVE TUBING

**Jomblang Cave** is located at Gunung Kidul Regency, Yogyakarta. Gunung Kidul area is located about 30 km eastern of Yogyakarta City. Gunung Kidul area is one of the most important karst ecosystems in Indonesia. Nowadays, the caves have functioned as the special interest tourism especially cave adventure tourism. The Jomblang Caves is very famous because of the light which entering vertically from another cave, Grubug Cave. After soft trekking about 15 minutes,

you will see the fall of thousands light into the underground river at a depth of 100 meters *Grubug* hole. **Pindul Cave** is located north west Jomblang Cave, it's only needs 30 minutes to reach Pindul Cave by car. There is undergrounds river inside of the cave. We will explore the cave by tubing.
